

Summary: No Evidence of Misconduct by BLM Employee

Report Date: June 15, 2018

Report Number: 16-0942

The OIG investigated allegations that a Bureau of Land Management (BLM) employee shared proprietary contract information, accepted bribes, and had improper relationships with Government contractors.

We found the employee socialized with Government contractors on a regular basis, which had the appearance of a conflict of interest to some colleagues, but did not violate ethics regulations. We found no evidence that the employee shared proprietary contract information or accepted bribes from Government contractors.

This is a summary of a report that was issued to the BLM Deputy Director.
